

Late Night Brain Fog

Visual identity for a late-night ideas podcast. Two light sources. No smoke.

PALETTE

TYPE

Fraunces Soft Bold — display / wordmark

Brain Fog

Space Grotesk — body, UI, episode titles

Two people, a late hour, and the kind of idea that only arrives after the house goes quiet.

Both families SIL OFL 1.1. No client license required.

WORDMARK

- System: chromatic misregistration + two-disc mark.
- Sodium ghost offset left, television ghost offset right, ink sits on top.
- Offset = 0.4% of frame width (5 px at 1200, 14 px at 3000).
- Lockups: horizontal, stacked, mark-only. Use mark-only under 120 px.
- Title case on “Brain Fog.” Small caps / tracked Space Grotesk for LATE NIGHT.
- Clear space: one disc-radius around the mark. Do not outline, rotate, or recolor.

HOW TO MAKE A NEW ASSET

1. Night field #14110E. Two-disc mark or misregistered wordmark. Nothing else as a logo.
2. Type: episode titles in Space Grotesk Bold, ink/primary. Guest line in haze.
3. Episode cards: call render_episode_card(number, title, guest). Do not edit draw code.
4. Audiogram: keep all type above y=504 on a 1080 square. Waveform lives y=560–860.
5. Avatar: mark only, critical geometry inside a centered circle. Test the crop.
6. Motion is slow. 10-second loops. This is 2am, not an energy drink.
7. If it would look at home on a dispensary flyer, start over.

HARD BANS

- No cannabis leaves, smoke wisps, tie-dye, rolling papers, or psychedelic swirls.
- No green as a dominant hue. Fog in the name is mental, not literal.
- No pure black, pure white, or pure grey. Night is warm. Paper is warm. Haze leans sodium.
- Do not imitate a living artist. Do not use unlicensed fonts.
